

Patient Tracker

With a million things to do everyday, make sure that knowing when and where your patients are is as simple as looking up at a screen.

Informative

Keep yourself updated when patients are going to show up, as well as who's already here. Create custom views for arriving, waiting, seated, and checkout. Anyone can easily add the Patient Tracker widget to their Dashboard to stay informed.

On-Time

Keep your office on-time and running smoothly by displaying signed-in patients and important reminders in the operatory with patient photos if desired. Patient Tracker also works in tandem with the Scheduler and Light Bar to keep your office aware of when patients arrive.

Efficient

Keep your practice running like a well-oiled machine. Reduce down time and keep up with patients entering and leaving the office. With customized sign-in screens, quick drag and drop features for moving patients from one status to another, and reports that encourage patient promptness, Patient Tracker lets you stay efficient.

Doctor Time

Stay on top of where you're scheduled and when. Patient Tracker allows you to utilize your Light Bar to see where your doctor is needed. With color-coded viewing on the Light Bar, you can effectively use your time and stay on top of your scheduling.

The screenshot displays the Ortho2 Edge software interface. At the top, there's a navigation bar with various tools like Sign-In, Reminders, and Scheduler. The main area is divided into three sections: Arriving (10), Waiting (4), and Seated (3). A 'Light Bar' on the right shows patient status for different chairs: Chair 2 - Emily (Julia), Chair 3 - Jenni (Karin), Chair 4 - Laura, and Chair 5 - Tammy (Mycah). Below the main tables, there are three patient cards for Mark, Jacki, and Patricia. A green arrow points from the Jacki card to a detailed patient profile for Carla P. Joiner, which includes appointment times, contact details, and responsible parties.

"We live by Edge Cloud's Patient Tracker to keep us on task. It ensures patients get seen on time and we stay on schedule."

- Dr. Dave Paquette, Charlotte, NC

Patient Tracker

You're reliable, make sure your patients are too. With a quick read of a screen, you can see who's here, who's waiting, and who's seated all with a quick glance. Customize Patient Tracker to better enhance a patient's status, giving you second-to-second updates on them. When fully integrated with the Scheduler and Light Bar, Patient Tracker can help you achieve the perfect day.
